## ASSESSMENT REPORT

ט"ו

July '07: I found a Tarna Mare map, which shows the exact size of the cemetery. There are parts where no gravestones can be seen, but this is the total size of the cemetery, altogether 290 m. This is a huge area but our practice is to enclose the whole cem.  
290 x 18 000 = 5 220 000 Ft  
There are going to be extra costs, like the building of a bridge, filling up an area that is being washed away by water and making a ditch: approx 4500 USD.

3-30-06: There is a gully which can be solved with making a ditch or filling the pit.

**Note: This Report is a rough estimate generated by the initial evaluation. details may change as project draws closer**
