ASSESSMENT REPORT

ט"ו

There used to be a fence with concrete foundation, poles and maybe wooden panels.
The old foundation could be traced very easily, and the exact length could be calculated.
The side of the cemetery by the road (62m) next to the trench should be filled with empty concrete cubes in order to prevent the erosion of the ground and with that, the slipping of the future fence. Also, since the cemetery is on a hillside, this would prevent the matzeivos from slipping too.

Note: This Report is a rough estimate generated by the initial evaluation. details may change as project draws closer
